# **Digital DECATHLON**

Loreen Zeisberg, Jade University of Applied Sciences

Digital transformation

Change of an entire industry

New training offers must meet these changing requirements

# We have to build digital and better

more resource-efficient

climate-friendly

quality-assured

taking into account the entire life cycle

with **new training**  
**concepts** that

- take everyone on the path to the digitalization of construction planning
- leave no one behind
- bring people together for joint collaboration
- strengthen intercultural skills that are of high value in today's globalized working world

# BIM

## — (Building Information Modeling)

Building Information Modelling (BIM) plays an important role in the digitalization of the construction industry. BIM is the digital model and working method for the design, construction, operation and deconstruction of buildings. It is about building more digitally and using digital transformation to design, construct, operate and deconstruct buildings in a better, more resource-efficient, climate-friendly and quality-assured way.

Digitalization BIM-related lectures are now offered as a subject at many universities in almost all countries, but the focus is rarely on the practical application of what has been learned. There should be much more emphasis on experiencing and designing with virtual models. Learning to work together on a model is best achieved in decentralized teamwork.

# The Project

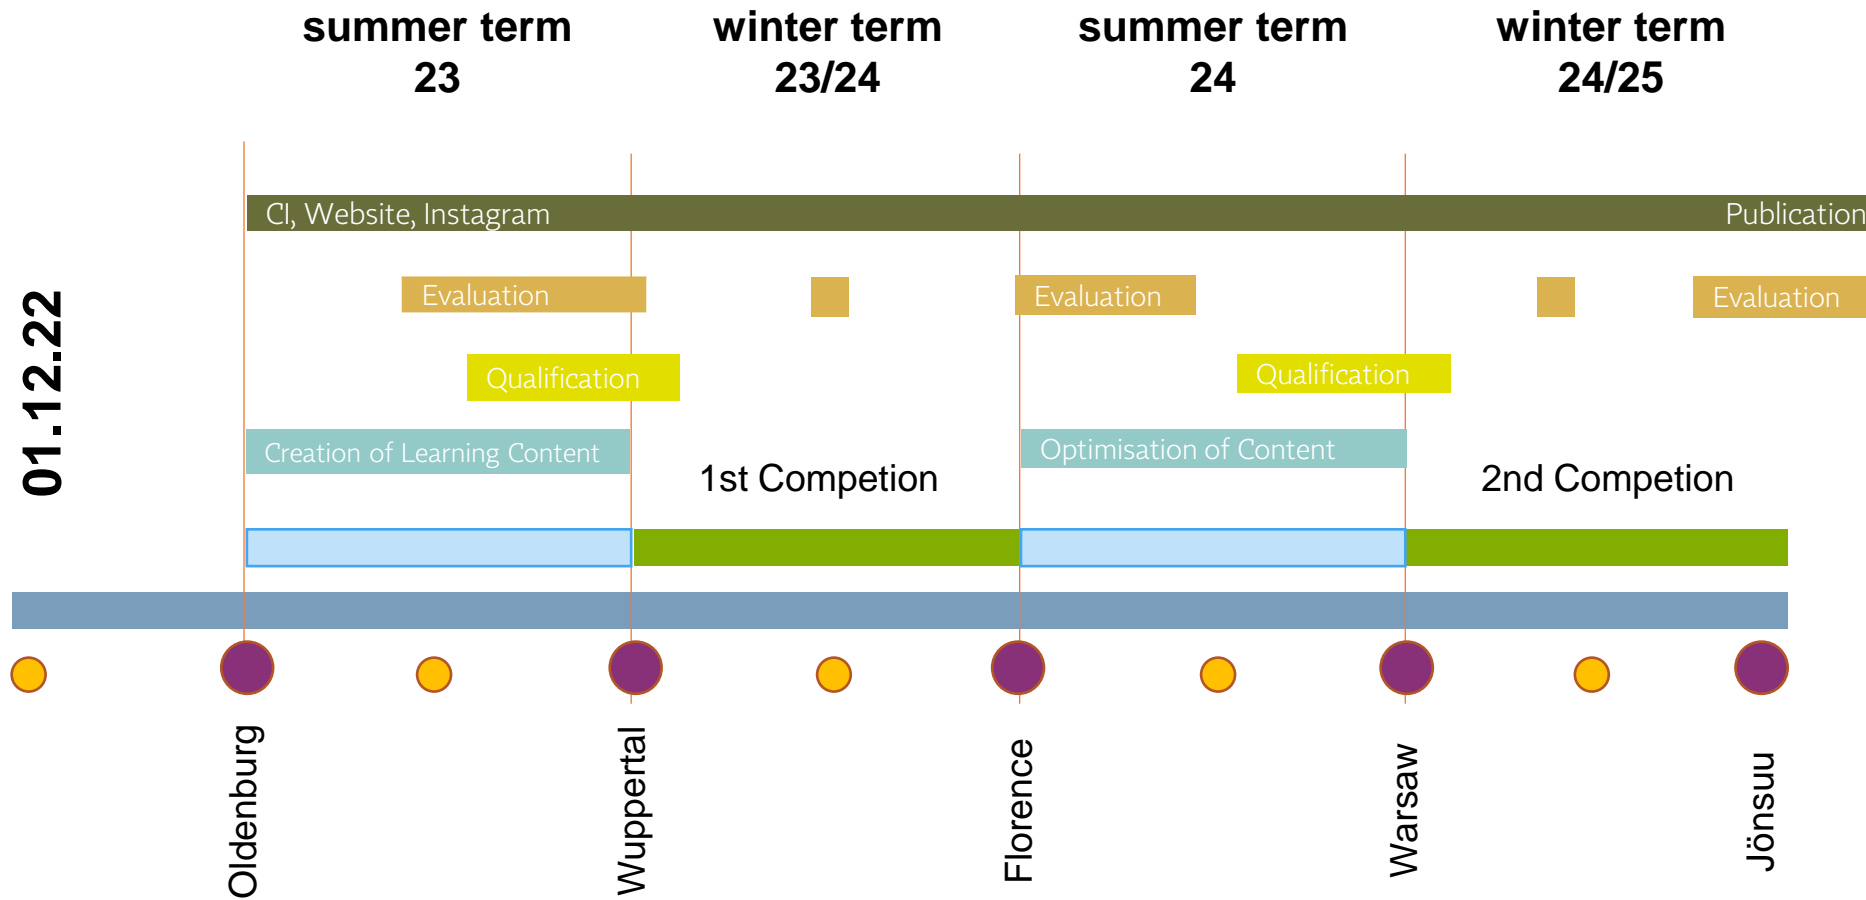

## **DIGITAL DECATHLON –**

**A multi-disciplinary design competition for students at universities across Europe**

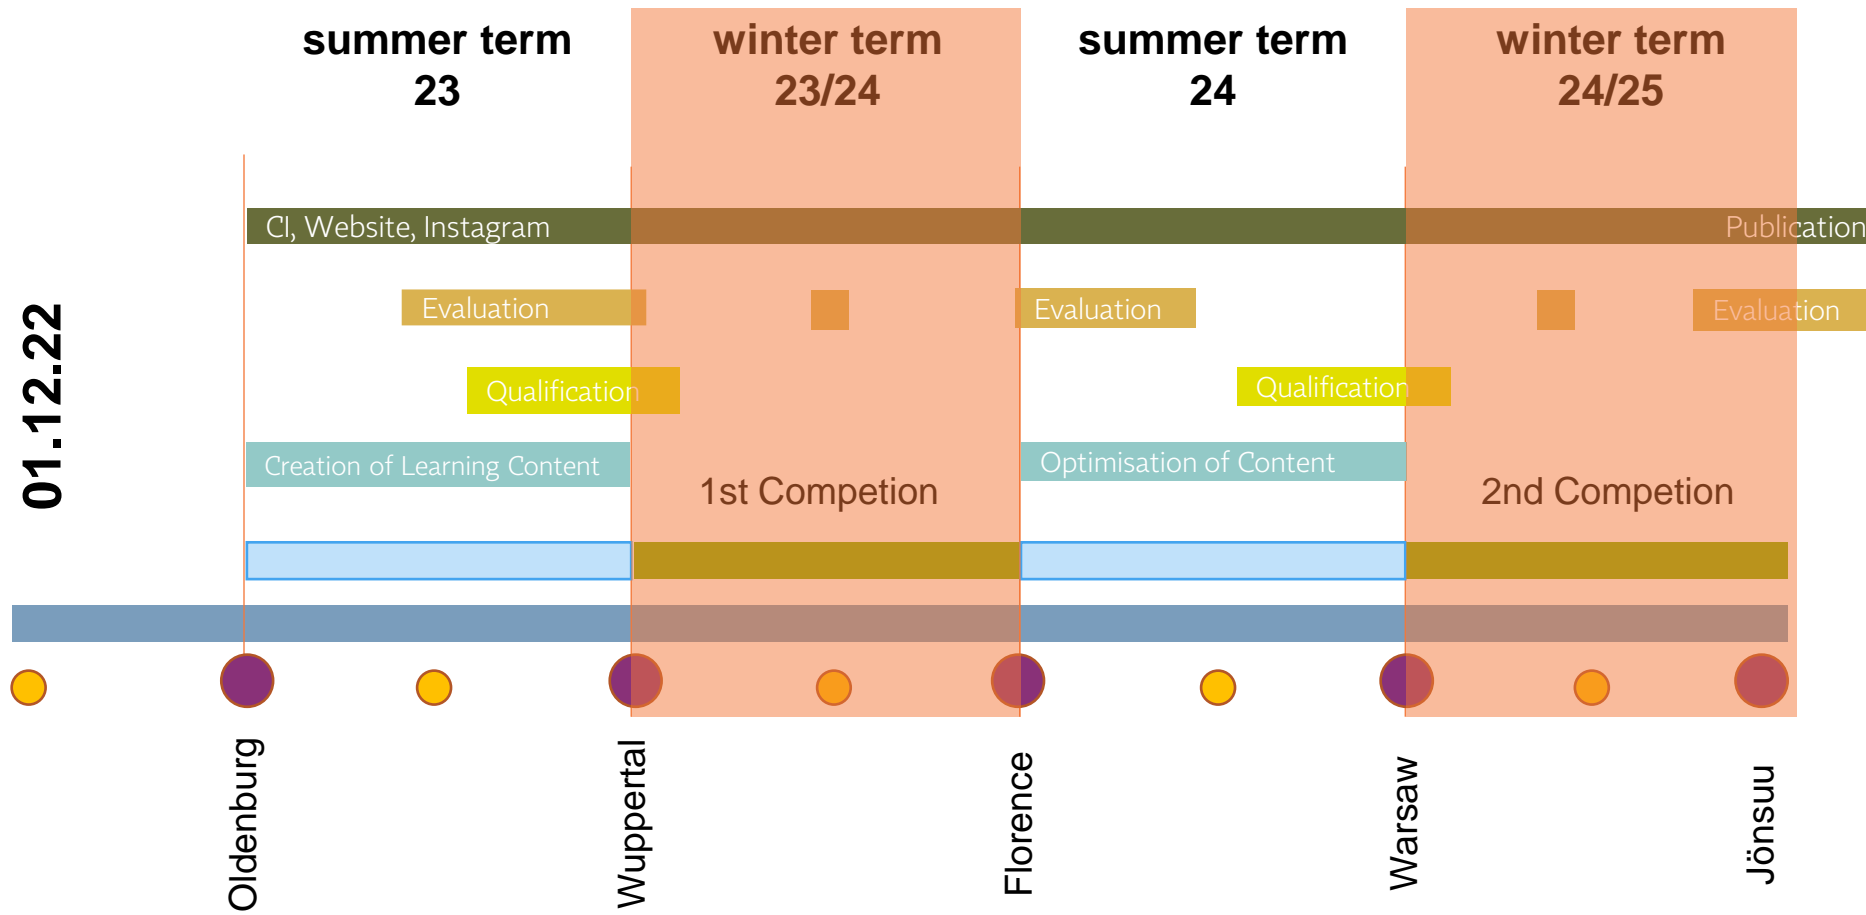

DIGITAL DECATHLON stands for Digital Design Collaboration in Higher Education and is an EU-funded Erasmus+ project - Cooperation Partnerships (KA220)

The Digital DECATHLON is an interdisciplinary and intercultural competition for students of architecture, civil engineering, building services engineering and related disciplines to train digital design skills using Building Information Modeling tools and methods in a collaborative way of working. In addition, the Digital DECATHLON is a unique training that provides participating students with an easy introduction to digital design and prepares them to work together in international teams. The competition links higher education institutions in Europe and promotes European identity. It opens new horizons of knowledge and perspectives of cooperation.

# Schedule

# Schedule

# Project Partners

The creation of these resources has been (partially) funded by the ERASMUS+ grant program of the European Union under grant no. 2022-1-DE01-KA220-HED-000086134. Neither the European Commission nor the project's national funding agency DAAD are responsible for the content or liable for any losses or damage resulting of the use of these resources.

# Disciplines

**D 01: ARCHITECTURE**

**D 02: CONSTRUCTION**

**D 03: MEP**

**D 04: MODEL CHECKING**

**D 05: BIM DESIGN COORDINATION and COMMUNICATION**

**D 06: CONSTRUCTION SCHEDULING**

**D 07: LIFE CYCLE ASSESSMENT**

**D 08: SIMULATION**

**D 09: BUILDING PRODUCT TRACEABILITY**

**D 10: REPORTING**

These ten disciplines provide project participants with a comprehensive and in-depth understanding of the world of Building Information Modelling (BIM). By delving into these different areas, participants will gain a holistic perspective on the multifaceted aspects of BIM and its central role in the architecture and construction industry.

# Disciplines

**D 01: ARCHITECTURE**

Covers the principles and practices of architectural design.

**D 02: CONSTRUCTION**

**D 03: MEP**

**D 04: MODEL CHECKING**

**D 05: BIM DESIGN COORDINATION and COMMUNICATION**

**D 06: CONSTRUCTION SCHEDULING**

**D 07: LIFE CYCLE ASSESSMENT**

**D 08: SIMULATION**

**D 09: BUILDING PRODUCT TRACEABILITY**

**D 10: REPORTING**

# Disciplines

**D 01: ARCHITECTURE**

**D 02: CONSTRUCTION**

Focuses on timber construction, project planning and execution.

**D 03: MEP**

**D 04: MODEL CHECKING**

**D 05: BIM DESIGN COORDINATION and COMMUNICATION**

**D 06: CONSTRUCTION SCHEDULING**

**D 07: LIFE CYCLE ASSESSMENT**

**D 08: SIMULATION**

**D 09: BUILDING PRODUCT TRACEABILITY**

**D 10: REPORTING**

# Disciplines

**D 01: ARCHITECTURE**

**D 02: CONSTRUCTION**

**D 03: MEP**

Examines mechanical, electrical and plumbing systems in buildings.

**D 04: MODEL CHECKING**

**D 05: BIM DESIGN COORDINATION and COMMUNICATION**

**D 06: CONSTRUCTION SCHEDULING**

**D 07: LIFE CYCLE ASSESSMENT**

**D 08: SIMULATION**

**D 09: BUILDING PRODUCT TRACEABILITY**

**D 10: REPORTING**

# Disciplines

D 01: ARCHITECTURE

D 02: CONSTRUCTION

D 03: MEP

D 04: MODEL CHECKING

D 05: BIM DESIGN COORDINATION and COMMUNICATION

D 06: CONSTRUCTION SCHEDULING

D 07: LIFE CYCLE ASSESSMENT

D 08: SIMULATION

D 09: BUILDING PRODUCT TRACEABILITY

D 10: REPORTING

Teaches the process of meticulous model checking to ensure design compliance.

# Disciplines

**D 01: ARCHITECTURE**

**D 02: CONSTRUCTION**

**D 03: MEP**

**D 04: MODEL CHECKING**

**D 05: BIM DESIGN COORDINATION and COMMUNICATION**

**D 06: CONSTRUCTION SCHEDULING**

**D 07: LIFE CYCLE ASSESSMENT**

**D 08: SIMULATION**

**D 09: BUILDING PRODUCT TRACEABILITY**

**D 10: REPORTING**

Covers Building Information Modelling (BIM) for design coordination and effective team communication.

# Disciplines

D 01: ARCHITECTURE

D 02: CONSTRUCTION

D 03: MEP

D 04: MODEL CHECKING

D 05: BIM DESIGN COORDINATION and COMMUNICATION

**D 06: CONSTRUCTION SCHEDULING**

D 07: LIFE CYCLE ASESMENT

D 08: SIMULATION

D 09: BUILDING PRODUCT TRACEABILITY

D 10: REPORTING

Covers construction scheduling, project time management and resource allocation.

# Disciplines

**D 01: ARCHITECTURE**

**D 02: CONSTRUCTION**

**D 03: MEP**

**D 04: MODEL CHECKING**

**D 05: BIM DESIGN COORDINATION and COMMUNICATION**

**D 06: CONSTRUCTION SCHEDULING**

**D 07: LIFE CYCLE ASSESSMENT**

**D 08: SIMULATION**

**D 09: BUILDING PRODUCT TRACEABILITY**

**D 10: REPORTING**

Examines environmental impact assessment and sustainability practices in construction.

# Disciplines

**D 01: ARCHITECTURE**

**D 02: CONSTRUCTION**

**D 03: MEP**

**D 04: MODEL CHECKING**

**D 05: BIM DESIGN COORDINATION and COMMUNICATION**

**D 06: CONSTRUCTION SCHEDULING**

**D 07: LIFE CYCLE ASSESSMENT**

**D 08: SIMULATION**

**D 09: BUILDING PRODUCT TRACEABILITY**

**D 10: REPORTING**

Explores simulation tools for optimizing design and construction processes.

# Disciplines

**D 01: ARCHITECTURE**

**D 02: CONSTRUCTION**

**D 03: MEP**

**D 04: MODEL CHECKING**

**D 05: BIM DESIGN COORDINATION and COMMUNICATION**

**D 06: CONSTRUCTION SCHEDULING**

**D 07: LIFE CYCLE ASSESSMENT**

**D 08: SIMULATION**

**D 09: BUILDING PRODUCT TRACEABILITY**

**D 10: REPORTING**

Focuses on product traceability to ensure the quality and integrity of building materials.

# Disciplines

**D 01: ARCHITECTURE**

**D 02: CONSTRUCTION**

**D 03: MEP**

**D 04: MODEL CHECKING**

**D 05: BIM DESIGN COORDINATION and COMMUNICATION**

**D 06: CONSTRUCTION SCHEDULING**

**D 07: LIFE CYCLE ASSESSMENT**

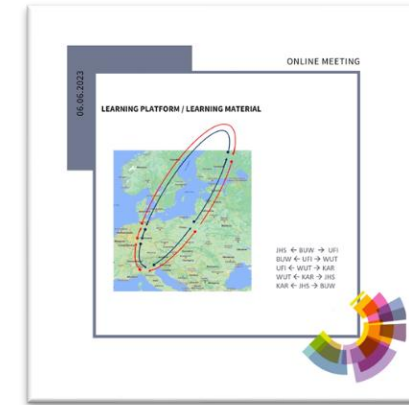

**D 08: SIMULATION**

**D 09: BUILDING PRODUCT TRACEABILITY**

**D 10: REPORTING**

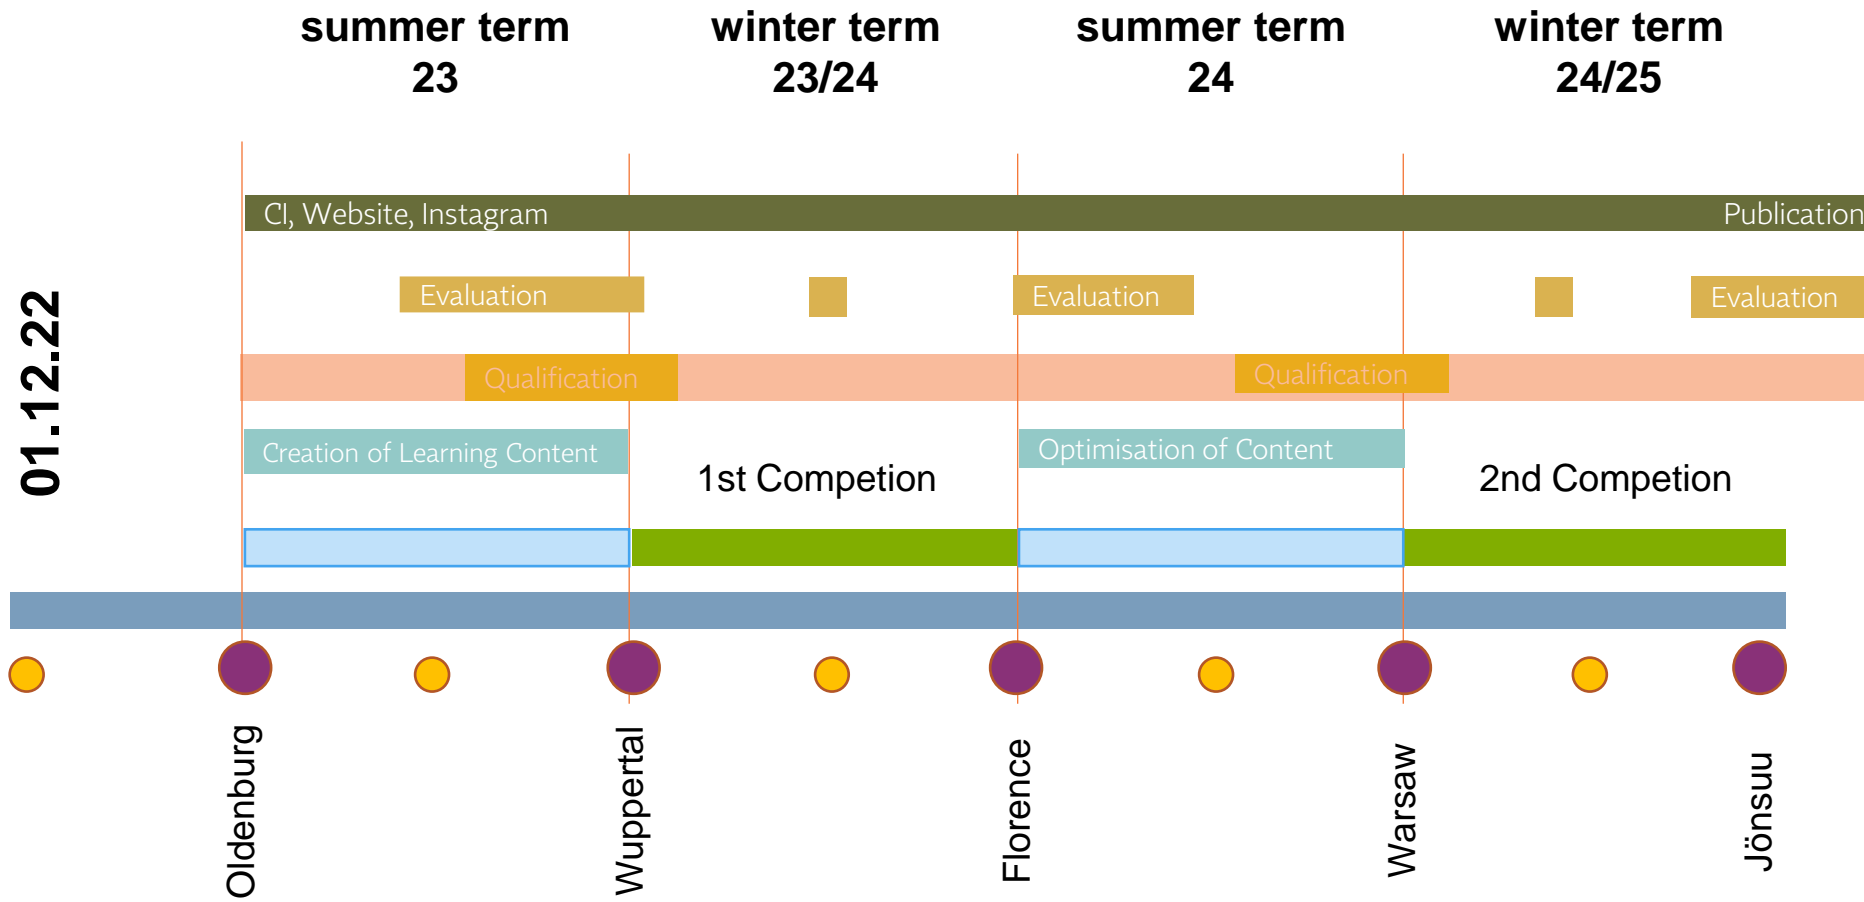

Develop effective reporting skills to communicate project progress and results to stakeholders.

# First Competition

Start in Wuppertal, Germany: 10th October 2023  
Final in Florence, Italy: 16th February 2024

# First Competition

# start event

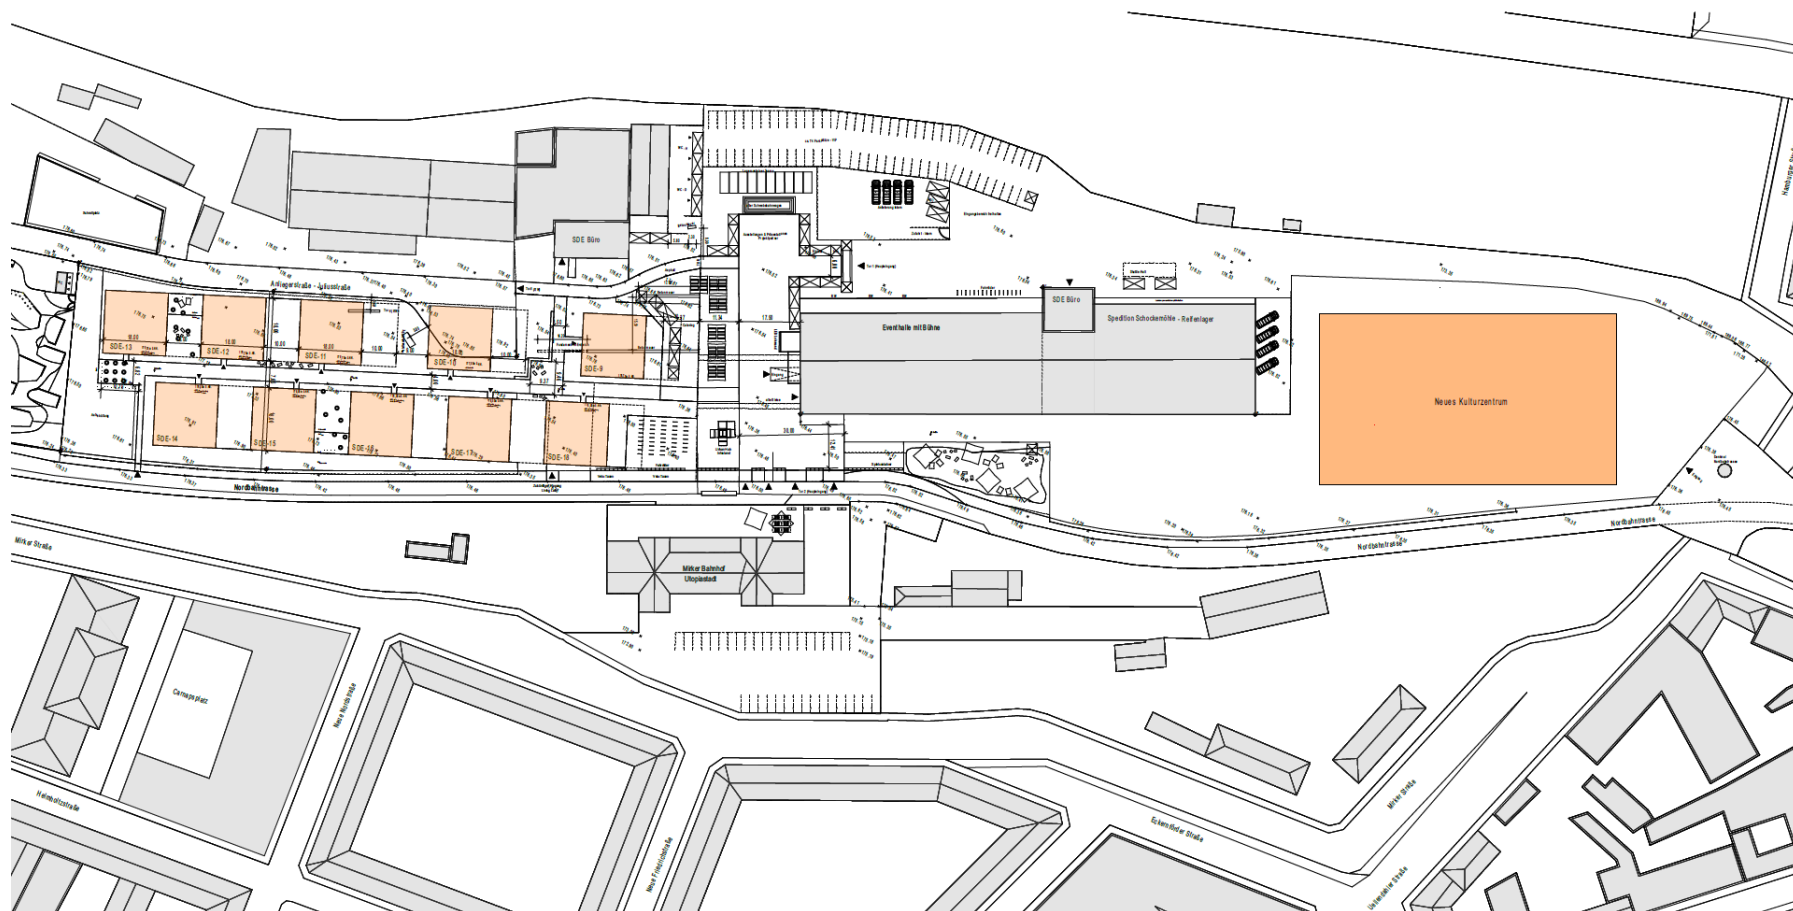

# Design Task

In the northern part of Wuppertal, close to the motorway A 46 there is a logistics center of around 4,000 square meters. This hall is to be converted into a cultural center and thus promote the structural change of the area from an industrial site to a lively quarter with exciting cultural offerings. The use should be as flexible as possible. Planned events may include, for example, concerts, weddings, dance events, lectures, workshops, open workspaces.

### D01 ARCHITECTURE – JHS

Create a room program for the hall that takes into account its new use as a cultural center.

Design the event hall in a 3D model and derive the following drawings out of it: Floor plan, elevations and sections in 1:200, façade section 1:20. Present your design in renderings and videos.

## STREETMEKKA EFFEKT

### VIBORG, DENMARK

In the interplay of the various elements and with the best possible continued use of the existing building as well as the materials obtained on site and partially recycled, the planners have created an extremely robust, yet flexibly usable space where the young people can meet casually and experience and live out different talents.

Source text and picture: Jugendkultur: Zentrum „Streetmekka“ in Viborg (DK), EFFEKT (dk-bauzeitung.de)

## ALSTOM HALLES FRANKLIN AZZI

### NANTES, FRANCE

\*featuring a saw-toothed roof line, the new three-level hall is transparent in both its operations and materiality: wrapped in a translucent cladding framed in steel, the interior space is completely lit by natural light; this blurring between the interior and exterior results in an 'inner street', a wide circulatory route that connects a number of programs within the hall as well as serving as a connector between different buildings on site.

## ROOM PROGRAM

The existing hall has a floor area of about 4000 m<sup>2</sup>. A minimum of 30% of the floor area has to be double-storeyed that the new cultural center can be used from the visitor from different levels.

The new cultural center will include storage for the Solar Decathlon that some of the existing pavilions can be stored or new pavilions can be built indoors. Besides the requirements create a mixed room program with a space for 500 visitors for young and old.

Mandatory uses: office, sanitary facilities, stage, storage for Solar Decathlon

### Extension of the room program:

- Restaurant, café, show-cooking rooms
- Library, working rooms, painting, maker spaces
- Event hall with a stage, market hall, cinema, theater, music rooms, museum
- Climbing hall, (ice) – skating ring, swimming pool, fitness studio
- Playing basketball, football, (mini) golf, athletics, children playground
- Extension of the beach, urban gardening, urban farming, view tower
- And don't forget the ancillary uses like sanitary facilities, checkroom or lockers, cleaning room, technical space, storage areas, ...
